

Quality Assurance

CMD – Precision Manufacturing Group Has Earned the Reputation for Being an Industry Leader Who Provides Exceptional Manufacturing Services. The Tradition of Quality and Excellence Is Inherent in Our Culture.

At CMD – Precision Manufacturing Group, quality disciplines are incorporated throughout all phases of manufacturing. Quality component fabrication must be preceded with advanced engineering and design support. Our superior design and engineering team raises the industry standard for providing first class part design assistance.

Commitment: CMD – Precision Manufacturing Group will design and manufacture ultra-precision machined products that meet or exceed all customer requirements.

- As an AS9100D and ISO 9001:2015 certified facility, CMD – Precision Manufacturing Group has a state-of-the-art metrology lab and Quality Management System. Our advanced measurement equipment includes in-process inspection probes, leading-edge scanning head CMM's and vision systems that provide accurate and timely in-process and final inspection.
- Our manufacturing plans require frequent quality assurance checks throughout the manufacturing process to ensure 100% print conformance. We utilize the latest CMM equipment, vision systems and other technologies to measure critical to quality (CTQ) and other control dimensions and to record all required data.

Committed To Continuous Improvement: Our employees are involved in advanced technical training programs. Our team takes special pride in the craftsmanship and quality of the products that they produce.

Quality Policy: Through continual improvement, we commit to being quality focused and customer driven; providing the highest level of customer satisfaction, quality products and on-time delivery.
